I Nonequilibrium Green's Functions: History, General Problems, Plasmas

Introduction	1
Story about the Temperature Technique	
<i>A. A. Abrikosov</i>	2
Real-time Nonequilibrium Green's Functions	
<i>L. V. Keldysh</i>	4
Theory of High-T_c Superconductivity in Layered Cuprates	
<i>A. A. Abrikosov</i>	18
Correlated Quantum Plasmas in Strong Laser Fields	
<i>M. Schlanges, P. Hülse, Th. Bornath, D. Kremp</i>	50
Thermodynamic Functions of Dense Quantum Plasmas	
<i>J. Vorberger, M. Schlanges, W. D. Kraeft, H. E. DeWitt</i>	66
Contribution of One-Time Pair Correlation Function to Kinetic Phenomena in Nonequilibrium Gas	
<i>A. Ya. Shul'man</i>	74
Correlation Induced Heating and Cooling of Many-Body Systems	
<i>D. Semkat, M. Bonitz, D. Kremp, M. S. Murillo, D. O. Gericke</i>	83
Short-Time Dynamics of Quantum Many-Body Systems Following a Spin Statistics Switch	
<i>M. Bonitz, D. Semkat, M. S. Murillo, D. O. Gericke</i>	94
Many-Body Approaches to Time-Dependent Resonance Fluorescence	
<i>Vl. C. Roerich, A. N. Starostin, A. A. Panteleev</i>	103

Implication of Coherent State and Hartree-Fock Approximation to Studying Resonance Rayleigh Scattering	
<i>Vl. K. Roerich, M. G. Gladush</i>	112

II Quantum Transport in Semiconductors

Introduction	121
Nonequilibrium Green's Functions in Quantum Transport Theory for Semiconductors	
<i>N. J. M. Horing</i>	122
Nonequilibrium Transport in Nanoscale Semiconductor Devices	
<i>D. K. Ferry, I. Knezevic, S. M. Ramey, L. Shifren</i>	127
Non-Equilibrium Green's Functions in Semiconductor Device Modeling	
<i>R. Lake, D. Jovanovic, C. Rivas</i>	143
A Sampling of Green's Functions for Electrons Subject to Finite Fields, Superlattice and Confining Potentials	
<i>N. J. M. Horing</i>	159
Nonequilibrium Green's Function Formulation of Quantum Transport Theory for Multi-band Semiconductors	
<i>P. Zhao, N. J. M. Horing, D. L. Woolard, H. L. Cui</i>	173
Nonequilibrium Green Function Modelling of Transport in Mesoscopic Systems	
<i>A.-P. Jauho</i>	181
Bohm Trajectories in Quantum Transport	
<i>J. R. Barker</i>	198
Nonequilibrium Transport in Open Quantum Systems	
<i>I. Knezevic, D. K. Ferry</i>	214

Full-Band Approach to Impact Ionization and High-Field Transport in Wide Band Gap Semiconductors
A. Kuligk, N. Fitzner, R. Redmer, M. Reigrotzki 223

Nonequilibrium Green's Function Analysis of Induced Magnetic Moment in a Biased Double-Wire System
A. Yu. Smirnov, L. G. Mourokh, N. J. M. Horing 231

Origin of Intrinsic Oscillations in Double-Barrier Quantum-Well Systems
P. Zhao, D. L. Woolard, H. L. Cui, N. J. M. Horing 239

III Optical and Electronic Properties of Semiconductors

Introduction 247

Light Emission and Lasing of a Partially Ionized Electron-Hole Plasma
K. Henneberger, T. Schmielau 248

Phase Space Filling in the Electron-Hole Pair Green's Function
T. Schmielau 265

Coulomb Correlations in the Quantum Kinetics of Electron Phonon Systems
W. Schäfer, P. Gartner, F. Jahnke 274

Electron-Phonon Quantum Kinetic Effects in the Linear Optical Properties of Semiconductors
T. Klähn, G. Manzke, K. Henneberger 291

Excitonic Quantum Coherences and Correlations in Semiconductor Quantum Wells
R. Binder, N. H. Kwong, I. Rumyantsev, Z. S. Yang 301

Exciton-Phonon Interaction in Semiconductors with Intermediate Polaron Coupling
P. Gartner, F. Jahnke, W. Schäfer 314

Photoexcited Transients in Disordered Semiconductors: Kinetically Induced Electron-Hole Correlation	
<i>A. Kalvová, B. Velický</i>	322
Few-particle States in Coupled Electron-Hole Quantum Dots	
<i>E. Anisimovas, F. M. Peeters</i>	330
Intershell Rotation Barriers of Mesoscopic 2D Coulomb Clusters	
<i>V. Golubnychiy, A. Filinov, M. Bonitz</i>	338

IV Nuclear Matter and High Energy Physics

Introduction	347
Renormalization of Self-consistent Φ-derivable Approximations	
<i>H. van Hees, J. Knoll</i>	348
Nonequilibrium Quantum Fields with Large Fluctuations	
<i>J. Berges, M. M. Müller</i>	367
Crossover from Neutron-Proton Superfluidity to Bose-Einstein Condensation of Deuterons in Nuclear Matter	
<i>A. A. Isayev</i>	375
Collision Integrals in the Kinetics of Vacuum Particle Creation in Strong Fields	
<i>S. A. Smolyansky, A. V. Reichel, D. V. Vinnik, S. M. Schmidt</i>	384
Kinetics of Vacuum Pair Creation in Strong Electromagnetic Fields	
<i>A. V. Tarakanov, A. V. Reichel, S. A. Smolyansky, D. V. Vinnik, S. M. Schmidt</i>	393
A Vlasov Type Kinetic Equation for Quarks in Strong Gluon Fields	
<i>A. V. Prozorkevich, S. A. Smolyansky, S. V. Ilyin</i>	401

V Alternative Computational Methods

Introduction	409
Time-Dependent Density Functional Theory from a Practitioners Perspective <i>K. Andrae, A. Pohl, P.-G. Reinhard, C. Legrand, M. Ma, E. Suraud.</i>	410
Nonequilibrium Green Functions in Time-Dependent Current-Density-Functional Theory <i>R. van Leeuwen</i>	427
Path Integral Monte Carlo Simulations of Bound States in Semiconductor Quantum Wells: Excitons, Trions and Biexcitons <i>A. V. Filinov, M. Bonitz, Yu. E. Lozovik</i>	436
Combination of Quantum Kinetic Theory and First-Principle Simulations for Strongly Correlated Quantum Plasmas <i>M. Bonitz, D. Semkat, D. Kremp, V. S. Filinov</i>	445
Wigner–Path Approach to Nonequilibrium Quantum Transport <i>C. Jacoboni, P. Bordone, R. Brunetti</i>	464
Tunneling of Interacting Identical Particles <i>Yu. E. Lozovik, A. V. Filinov, A. S. Arkhipov</i>	472
BBGKY–Dynamics: From Localization to Pattern Formation <i>A. N. Fedorova, M. G. Zeitlin</i>	481
Conclusion and Outlook	493
