Fax: +49 (0)431 880 4094

## The fourth informal workshop

# “Solving the Two-Time Kadanoff-Baym Equations. Status and Open Problems”

to be held 11<sup>th</sup> - 12<sup>th</sup> March, 2019 in Kiel, Germany.

Physikzentrum - Leibnizstrasse 15

### Aim:

During the successful interdisciplinary workshop “Progresses in Nonequilibrium Green’s Functions VII” held 27<sup>th</sup> - 31<sup>st</sup> August 2018 in Frascati (Italy) it became clear that more and more groups are starting or continuing to solve the two-time Kadanoff-Baym equations as well as the single-time version (GKBA). The outlined workshop shall provide the framework to discuss and exchange the experience in the numerics. In particular, the focus will be on topics that are not yet under control. Hence, we encourage the speakers to include at least one such problem in their talks.

### Speakers include:

Jan-Philip Joost

Nicola Lo Gullo

Andrea Marini

Yaroslav Pavlyukh

Gianluca Stefanucci

Riku Tuovinen

Robert van Leeuwen

Claudio Verdozzi
